

Exercise 1:

The screenshot shows the VS Code interface with the Explorer view on the left displaying the project structure. The main editor shows the `pom.xml` file for the `junitexercises` project. The file contains the following XML content:

```
1 <?xml version="1.0" encoding="UTF-8"?>
2 <project xmlns="http://maven.apache.org/POM/4.0.0"
3         xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
4         xsi:schemaLocation="http://maven.apache.org/POM/4.0.0 http://maven.apache.org/maven-v4_0_0.xsd">
5     <modelVersion>4.0.0</modelVersion>
6
7     <groupId>com.example</groupId>
8     <artifactId>junitexercises</artifactId>
9     <version>1.0-SNAPSHOT</version>
10
11     <properties>
12         <maven.compiler.source>17</maven.compiler.source>
13         <maven.compiler.target>17</maven.compiler.target>
14     </properties>
15     <dependencies>
16         <dependency>
17             <groupId>junit</groupId>
18             <artifactId>junit</artifactId>
19             <version>4.13.2</version>
20             <scope>test</scope>
21         </dependency>
22     </dependencies>
23
24 </project>
```

The bottom of the interface shows the Test Results view with the following output:

```
%TESTC 1 v2
%TSTTREE1.AssertionsTest,true,1,false,-1.AssertionsTest...
```

Exercise:3

The screenshot shows the VS Code interface with the Explorer view on the left displaying the project structure. The main editor shows the `AssertionsTest.java` file for the `junitexercises` project. The file contains the following Java code:

```
1 import static org.junit.Assert.*;
2 import org.junit.Test;
3
4 public class AssertionsTest {
5
6     @Test
7     public void testAssertions() {
8         assertEquals(expected: 5, 2 + 3);
9         assertTrue(5 > 3);
10        assertFalse(5 < 3);
11        assertNull(object: null);
12        assertNotNull(new Object());
13    }
14 }
```

The bottom of the interface shows the Test Results view with the following output:

```
%TESTC 1 v2
%TSTTREE1.AssertionsTest,true,1,false,-1.AssertionsTest,,
%TSTTREE2,testAssertions(AssertionsTest),false,1,false,-1,testAssertions(AssertionsTest),,
%TESTS 2,testAssertions(AssertionsTest)
%TESTE 2,testAssertions(AssertionsTest)
%RUNTIME30
```

Exercise 4:

The screenshot shows an IDE with a project named 'junitexercises'. The file explorer on the left shows the project structure, including 'src', 'main', 'resources', 'test', and 'target'. The 'test' directory contains 'AAATest.java' and 'AssertionsTest.java'. The 'AAATest.java' file is open in the editor, showing the following code:

```
1 import static org.junit.Assert.*;
2 import org.junit.Before;
3 import org.junit.After;
4 import org.junit.Test;
5 public class AAATest {
6     int num1;
7     int num2;
8     int result;
9     @Before
10    public void setUp() {
11        num1 = 10;
12        num2 = 20;
13        System.out.println("Before Test");
14    }
15    @After
16    public void tearDown() {
17        System.out.println("After Test");
18    }
19    @Test
20    public void testAddition() {
21        result = num1 + num2;
22        assertEquals(expected: 30, result);
23    }
24 }
```

The 'TEST RESULTS' tab at the bottom shows the following output:

```
%TESTC 1 v2
%STTREE1, AssertionsTest, true, 1, false, -1, AssertionsTest,,
%STTREE2, testAssertions (AssertionsTest), false, 1, false, -1, testAssertions (AssertionsTest),,
%TESTS 2, testAssertions (AssertionsTest)

%TESTE 2, testAssertions (AssertionsTest)

%RUNTIME30
```

The 'Test Runner for Java' tab on the right shows the test results, including the test class 'AssertionsTest' and the test method 'testAssertions()'. It also indicates that there are 2 older results.
